ATD International Conference & Exposition
Session Proposal Types

**Education session**

Education sessions are sessions with good coverage of fewer topics rather than limited coverage of many topics. These sessions are either 60 or 75 minutes in length and will be determined by ATD staff.

**Innogizer**

Active learning sessions that incorporate highly experiential activities, such as dance, improve, drumming, games, etc., into an energetic and innovative session.

**First Time ATD Speaker**

Individuals who have not spoken at an ATD International Conference and Expo or ATD TechKnowledge Conference. First time speakers will be required to submit a video.

**Panel**

Panels are moderated sessions of no more than four panelists plus the moderator. The moderator should have a pre-defined set of questions based in an overall program design for the panel discussion and incorporate audience questions and feedback into the discussion. As with other sessions, please show how the content will be immediately appropriate to the participant’s job.

**Preconference Workshop**

These full day workshops precede the start of the conference and are designed to offer an in-depth treatment of a topic to a smaller audience. They should be highly interactive and capture the best techniques, information, and topic application.
